PREFACE

The Government of Moldova, represented by the Ministry of Transport and Roads Industry (MTRI), is implementing a **Road Sector Program Support Project (the Project)** to be implemented from 2007 – 2010 and to be financed by the World Bank (WB), European Bank for Reconstruction and Development (EBRD) and European Investment Bank (EIB). The project is in direct support of the Government's overall Road Sector Program. The project is financed through three separate financing agreements signed between the Government of Moldova on one side, and IDA, EBRD and EIB on the other. IDA will provide an amount equivalent to US\$16 million, in the form of a Specific Investment Loan (SIL). EBRD and EIB will each contribute EUR 12,5 million as the first tranches. The total combined financing for the project from the three donors is estimated at US\$ 48.7 million equivalent. Upon successful completion of the first tranches, EBRD and EIB will each contribute EUR 17,5 million as the second tranches. The Government of Moldova has negotiations with such donors as USAID/Millennium Challenge Corporation and European Community, which could add their contribution to project financing.

The project is being implemented under the general supervision and responsibility of the Ministry of Transport and Road Industry (MTRI). However, actual project implementation is being carried out by the *State Road Administration (SRA)*. SRA's responsibilities include: procurement, financial management, contract management, project and program monitoring and evaluation, and reporting.

Although this project has a common prequalification format and will have a common tendering format; it is, in fact, being funded by three different agencies; the World Bank, the European Bank for Reconstruction and Development and the European Investment Bank. Each agency will fund one of the Contracts under the project.

This prequalification document and the tender documents which will be issued in due course follow the World Bank's Guidelines: Procurement under IBRD Loans and IDA Credits, May 2004 (revised October 2006) and format and text of the Standard Bidding Documents.

It is the intention of this prequalification to qualify applicants for the award of one, two or all three of the proposed contracts. Only qualified applicants from this prequalification process will be invited to bid for the Works.

The specialized work experience required for two contracts; Balti-Sarateni and Chisinau-Hincesti is more extensive than that required for the third, Chisinau-Orhei.

Successful applicants who have the specialized experience required for Balti-Sarateni and Chisinau-Hincesti will be eligible to bid for any or all of the three contracts, depending on their financial strength and history. Applicants who have only the more limited specialized experience required for Chisinau-Orhei will only be able to bid for that contract.

Applicants will be classed as eligible for the award of one, two or three contracts depending on financial strength and history. Subject to meeting the appropriate experience requirements, an applicant may bid on however many contracts he wishes; however, he will only be considered for the award of the number of contracts for which he is qualified based on financial strength and history. Eg. An applicant who was qualified for the award of one contract would be awarded only one contract.

In case that any Applicant seeks to qualify for more than one contract, however he meets the qualification criteria only for one of the contract, he will be requested to choose only one of such contract for which he will submit its bid

Subject to the above restrictions, bids for each contract shall be evaluated and contract awarded separately to the qualified firm(s) offering the lowest evaluated price for each contract.

PART 2 – Works Requirements

Section VI. Scope of Works

Contents

1. Description of the Works	2-2
2. Construction Period	2-3
3. Site and Other Data.....	2-4

1. Description of the Works

The works comprise the resurfacing and strengthening of existing roads in the central area of Moldova.

The Works have been divided into three separate, non-contiguous contracts which are expected to be of roughly equal value.

It is anticipated that the bulk of the works will comprise Asphaltic Concrete overlays laid over existing surfacing which will require reshaping by milling off high spots and laying regulating courses to low areas. Additional preparatory works will be required in some areas to deal with heavy cracking in the existing asphalt pavements. Limited sections of the project roads will require complete reconstruction comprising pavement removal, subbase, base and asphalt construction. Other sections will require partial reconstruction to full depth along the edges of the existing pavement where limited edge failures have occurred.

Road widths on all three contracts vary with sections of 6, 4, 3 and two lanes occurring in all contracts together with additional climbing lanes in some sections

In addition to the overlay and pavement reconstruction works there will be a limited amount of minor repair works to shoulders and side drainage and to structures.

On Contract 1; Balti – Sarateni and on Contract 3: Chisinau - Hincesti, slip remedial works to failed embankment slopes will be required. These works will probably take the form of toe reinforcement using bored piles of about 1 metre diameter linked with a reinforced concrete slab and coupled with reshaping of embankment slopes and the removal and replacement/ recompaction of the upper layers of the affected embankment areas. The volume of work in each case is likely to be in the order of 2000 lin.m. of piling and 50,000 cu.m. of earthworks. When completed, the remedial works areas will require to be vegetated with trees, bushes and grasses.

All the existing roads are of flexible pavement construction with asphalt surfacing on crushed stone base with the exception of Contract 3: Chisinau - Hincesti where the first 3.8 kilometers of the works are on concrete slab pavement.

It is anticipated that between 1,000 and 2,000 cu.m. of concrete paving will be required, including reconstruction of the section of pavement

2. Construction Period

Winter seasons in Moldova are not generally suitable for asphalt concrete production and laying. It is therefore intended that the contract periods will be arranged to allow two full summer working seasons for the implementation of the works.

3. Site and Other Data

Contract 1: Balti - Sarateni (67 kilometres approx.) follows the R14, commencing at the southern municipal boundary of Balti and running south east to Sarateni some 25 kilometers north of Orhei at the junction of R14 and M2. The final location of the end point at Sarateni will be established on completion of the final design. Remedial works to a serious slip area at the north end of the Singerei Bypass are included in the contract.

Contract 2: Chisinau – Orhei (40 kilometers approx.) follows the M2 and runs roughly north from Chisinau to Orhei commencing at the Chisinau municipal boundary. It is intended that the end point of the Contract will be in the region of Orhei and the final location of the end point will be established on completion of the final design.

Contract 3: Chisinau – Hincesti (30 kilometers approx.) follows the R3 commencing at the Chisinau municipal boundary and running roughly south west from Chisinau to link with the Hincesti Bypass. Remedial works to a serious slip area at the start of the project are included in the contract.

Aggregates

Applicants should be aware that the supply of suitable aggregates for high quality asphalt surfacing in Moldova is difficult. The country generally is limestone based and there is only one source of hard aggregate, granite, in the country at Soroca in the north. In the past supplies of hard aggregates have also been secured from the Ukraine and imported by rail.
